

The company's core expertise is concentrated in the field of industrial electric drives, electric motors, gearboxes, cable products, and pumping equipment. In Latvia, Lithuania and Estonia, we represent our partners, leaders in their industrial field.

Such companies as ABB, Advanced Energy, AVITEQ, Baumer Huebner, Baumuller, Bonfiglioli, Cear, Cemp, Conductix-Wampfler, Control Techniques, CZ-Carbon, Himmel Technologies, Edur, Emod Motoren, Marelli Motori, Lenze, Prysmian, Rossi, Sicme Motori, Speck Pumpen, Sprint Electric, VEM Group, Ziehl-Abegg, Zollern... You can see a more detailed list of our partners below.

One of our new directions is introduction of products from Chinese manufacturers to European market. We supply medium-voltage and low-voltage high-power electric motors produced by WMN (energy efficiency IE3-IE4), low-voltage electric motors ATB Sever (IE3, stock in Riga up to 75 kW) and INVT frequency converters (stock in Riga up to 132 kW). We maintain energy efficiency and significantly reduce the buying cost.

The strength of our company is our engineering service. Our engineers consult our customers and do commissioning at their site.

We do post-warranty repairs of large electric motors: you receive working equipment at a price of no more than 30-50% of the cost of new equipment and a guarantee for work from 6 to 12 months.
